Primary Care at Clinics Affiliated with the Santa Fe Medical Plan

Primary care is the fundamental pillar of an effective and accessible healthcare system. By enrolling in the Santa Fe Medical Plan (PMSF) and accessing our expanded network of primary care clinics, you benefit from:

- **Timely Access:** With clinics strategically located throughout Panama City, San Miguelito, Arraiján, La Chorrera, and Penonomé, quality medical care is now closer to your home or workplace, reducing wait times and travel distances.
- **Comprehensive Care:** The clinics offer a wide range of services under one roof, including general medical consultations, gynecology and pediatrics appointments, preventive check-ups, and chronic disease management.
- **Continuity of Care:** Primary care ensures constant monitoring of your health, allowing for early detection of health issues and effective management of chronic diseases.
- **Specialized Care Coordination:** If you need specialized care, your primary care physician can coordinate and refer you to specialists within the plan's network, ensuring comprehensive and cohesive medical attention.

Through this partnership, our goal is to provide you with accessible, timely, and high-quality primary healthcare that meets your needs and those of your family.
